IDENTIFIERS	*Colorado

ABSTRACT

This report provides information on the number of degrees awarded at Colorado public universities and colleges. Comparisons are made to the base year of 1982-83, allowing for 10-year comparisons. Detail by ethnicity and gender are available beginning in fiscal year (FY) 1985-86 and analyses by institutional sector, by degree level, and by program area are also presented. Terms and definitions are provided at the report's end. Statistical appendices comprise over 90 percent of the report. Appendix A contains a listing of degrees aggregated by institution and program area. The other two appendices provide, respectively, lists of programs by Classification of Instruction Program (CIP) codes and an alphabetical list of program names with a crosswalk to CIP codes. Among the findings are the following: (1) statewide, 27,017 degrees were awarded in FY 1992, an 18 percent increase over FY 1983; (2) every institutional sector showed an increase in awards granted since the comparison year for FY 1983; (3) the largest degree level increases were in bachelor's degrees and master's degrees; (4) over a 3-year period from FY 1990 to FY 1992, the number of ethnic minorities increased at every degree level except at the doctoral degree level; and (5) over the same 3-year period from women received more degrees than men at every degree level except at the doctoral level. EXECUTIVE SUMMARY

This report on degrees granted is an annual publication by the Colorado Commission on Higher Education (CCHE) that provides information on the number of degrees awarded and is used as a reference source in program evaluation and review. Program area and degree level attainment indicates the academic interests and commitment of the student population and the public higher educational system as a whole. The number and level of degrees conferred is one important outcome measure and assessment factor for Colorado's public higher education system.

Some highlights are:

- Statewide, the total number of degrees awarded for fiscal year 1992 (FY92) was 27,017 compared to 22,966 in FY83, an increase of 18%. Over the ten-year period from 1983 to 1992, there were nearly 240,000 degrees and certificates awarded.

- Every institutional sector showed an increase in awards granted since the comparison year of FY83, especially the local district colleges (up 41%). The research university sector awarded the highest number of degrees (10,364) followed by the university/college sector (9,437). The community college sector awarded 5,040 certificates/degrees.

- The largest degree level increases were in bachelor degrees (12,804 to 14,870) and master's degrees (3,277 to 4,257). For the first time, the number of certificate awards (2,487) nearly equalled the number of awards for vocational associate degrees (2,488). In FY83, there were twice as many vocational associate degrees awarded than certificates awarded. Academic associate degrees (1,897) exceeded the FY83 academic associate degrees awarded by 37%. First professional and doctoral degrees remained relatively constant throughout the ten-year period.

- In FY83 the top-five degree areas were:

[1] Business and Management (4,143);

[2] Health Sciences (2,294);

[3] Education (2,014);

[4] Engineering (1,655); and

[5] Social Sciences (1,503).

The top-five degree areas in FY92 were:

[1] Business and Management (4,875);

[2] Health Sciences (3,167);

[3] Social Science (2,395);

[4] Liberal/General Studies (2,169); and

[5] Engineering (1,513).

- Over a three-year period from FY90 to FY92, the number of ethnic minorities increased at every degree level except at the doctoral degree level. All racial/ethnic groups had high concentrations of numbers at the baccalaureate level, however, there was a difference in degree level growth rate by ethnicity. Blacks increased the number of certificates earned by 135% and associate degrees by 51%.. Native Americans, also, increased the number of awards earned at the certificate and associate levels by 52% each. Asians increased the number of master's degrees earned by 42% followed by certificates at 37%. Hispanics increased the number of certificates earned by 59% followed by first professional/doctorates earned by 38%.

- Over a three-year period from FY90 to FY92, women received more degrees than men at every degree level except at the doctoral degree level: there were 3,681 certificates awarded to females compared to 3,189 certificates awarded to males; 7,192 associate degrees awarded to females compared to 5,175 awarded to males; 22,760 bachelor degrees awarded to females compared to 20,409; 6,243 master's degrees awarded to females while 5,770 degrees were awarded to males; finally, 1,169 first professional/doctoral degrees were awarded to females compared to 1,861 awarded to males.

INTRODUCTION

The degrees granted report is disseminated annually by the Colorado Commission on Higher Education. This publication is titled, *Certificates and Degrees Conferred in Colorado Publicly-Supported Colleges and Universities 1982-83 Through 1991-92*. Detailed data can be obtained from the *Digest of Colorado Postsecondary Education Statistics* manuals. In addition, a listing of degrees offered is available in the CCHE publication, *Approved Postsecondary Degree and Certificate Programs in Colorado Public Colleges and Universities*.

Comparisons are made to the base year of 1982-83, allowing for ten-year comparisons. Since a revised Classification of Instruction Programs codes (CIP codes) became effective for FY92, all previously awarded degrees have been recoded into the new codes, hence, this publication supersedes all preciously published documents.

Detail by ethnicity and gender are available beginning in fiscal year 1985-86. Analysis by institutional sector, by degree level, and by program area are also presented.

Data for this report were gathered from two sources, both submitted and approved by the individual institutions. Prior to 1986, data were collected in summary form through the Higher Education General Information Survey (HEGIS). Beginning in fiscal year 1985-86, the data were collected on the degrees granted file of the Student Unit-Record Data System (SURDS).

Terms and definitions are provided at the end of the report. Appendix A contains a listing of degrees awarded by institution. Appendix B contains a listing of degrees aggregated by program area and shows all the institutions that granted awards in a particular program. Appendix C is an alphabetical list of program names with a crosswalk to CIP codes.

The sort order of Appendix A, for the first time, is by CIP code rather than program title. If the CIP code is unknown, Appendix C will serve as a lookup table. Different schools may use different CIP codes for the identical program name. Refer to the publication, *Classification of Instructional Programs, 1990 Edition*, to determine program emphasis by CIP code.

In Appendix A and B, a blank in a column means that a program was either not in operation or was discontinued. A zero in the column means that the open program did not grant awards for the entire fiscal year. At times a discontinued program may have several degrees awarded, in which case the number of degrees awarded takes precedence over the "blank column" indication. For accuracy in program review, consult the approved programs publications.

Colorado Public Higher Education System

Colorado has 28 state-supported higher education institutions. Based upon institutional role and mission and types of degrees granted, several institutional sectors are used in this report.

The sectors, composite institutions, along with their abbreviations, are shown in Table 1.

Classified Program Areas

Colorado has over 1,000 state-approved, degree programs at public higher education institutions. The programs are classified using the Classification of Instructional Programs codes (CIP codes).

The CIP code system was set up by the federal government to group similar programs. The full program code is six digits long and the first two digits of the code are designated as program areas.

Periodically, a restructuring of the CIP codes may become necessary as new programs evolve or old programs become extinct.

Fiscal year 1992 had two major changes to the CIP code scheme. First, the health-related programs (areas 17 and 18) were combined into a new comprehensive area 51 and the business-related programs (areas 06 and 07) were combined into the new expanded area 52. Table 2 shows the two-digit general area listing.

DEGREES AWARDED FY83 TO FY92

In FY92, the number of degrees granted reached an all-time record high of 27,017. Between FY83 and FY86, the number of degrees awarded decreased by an average of 300 degrees per year. Beginning in FY87, however, the number of degrees awarded increased by nearly 1,000 per year. The highest annual increase rate (6.2%) was between FY91 and FY92, when the number of degrees awarded increased by over 1,500 degrees. Over the ten-year period there were nearly 240,000 degrees awarded in higher education institutions in the state of Colorado.

DEGREES AWARDED BY INSTITUTION

In FY92 compared to FY83, there were over 4,000 more degrees awarded, an increase of 18% (see Table 3). Most institutions increased, some by over 50% (MESA, 55%; METRO, 64%; UCCS, 58%; UCD, 64%; FRCC, 84%; MCC, 51%; AIMS, 92%; and CMC, 71%). Others, however, experienced a decline in total degrees granted over the last ten years (CSM, -26%; UNC, -19%; USC, -6%; WSC, -38%; PPCC, -42%; RRCC, -22%; and NJC, -31%).

☞ Research Universities accounted for over 1,400 more degrees issued in FY92

☞ Universities/Colleges awarded nearly 1,400 more FY92 degrees

☞ Over 600 more awards at Community Colleges

☞ 140 more degrees awarded

☞ Local District sector had highest rate of increase

☞ Nearly, 240,000 degrees for state

Notes: - In fiscal year 1983, the Community College of Aurora's degrees were listed with the Community College of Denver. Fiscal year 1984 was the first year CCA awarded degrees.
-- Colorado Northwestern Community College was unable to report degrees in FY86.
[1] Front Range Community College includes Larimer County Area Vocational School beginning in FY90.

DEGREE LEVEL

The number of degrees granted at all levels, except vocational associate degrees, increased over the ten-year period (see Table 4). The greatest increase was at the certificate level, which increased by 66%, from 1,494 in FY83 to 2,487 in FY92. Vocational associate degrees decreased from 3,007 to 2,488 awards, a 17% decline. Academic associate degrees increased from 1,387 to 1,897, a 37% increase.

There were 14,870 bachelor degrees, an increase of 16%, awarded in FY92 compared to 12,804 awarded in FY83. Master's degrees increased from 3,277 to 4,257, an increase of 30%. The first professional and doctoral degree levels remained relatively stable over the ten-year period at 400 and 600 awards, respectively.

Mar 93

The proportion of the various degree levels changed between fiscal year 1983 and 1992. The largest percentage of total increase was at the certificate level, going from 6.5% of 22,966 total awards in FY83 to 9.2% of 27,017 total awards in FY92 (see Figure 2 and Figure 3).

The largest decrease was at the vocational associate degree level, 13.1% in FY83 and 9.2% in FY92.

Bachelor degrees, remained the largest portion, comprising over 55.8% of the total degrees awarded in FY83, and 55.0% in FY92.

Master's degrees were the next largest portion at 14.3% in FY83, and nearly 15.8% in FY92.

The portion of first professional and doctoral degrees decreased from 4.3% to 3.8%. Although the total numbers of these high level degrees increased, the relative growth at other levels was greater.

Academic associate degrees increased from 6.0% of the total, to 7.0% of the total by FY92.

Figure 2 - FY83 Degree Level Proportion

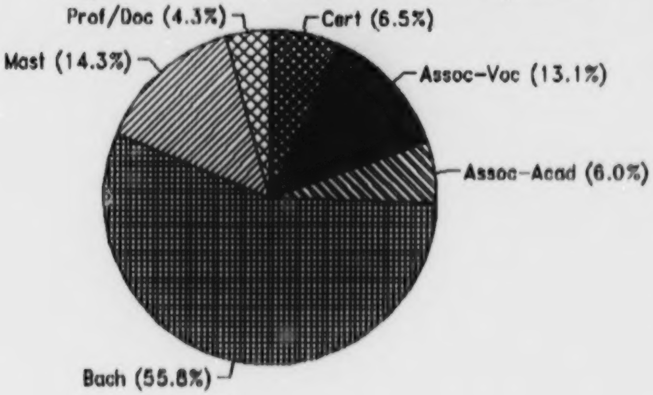

Figure 3 - FY92 Degree Level Proportion

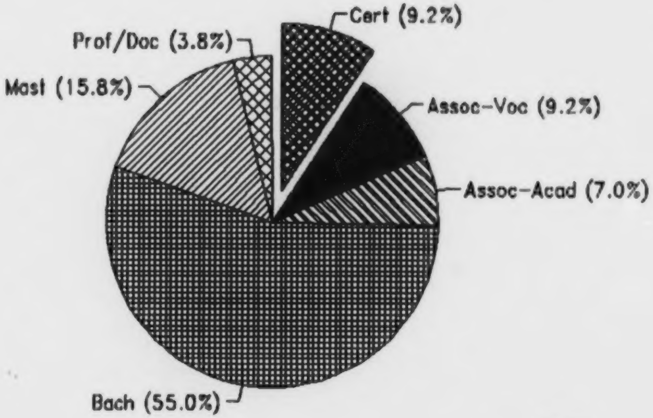

DEGREES BY CIP AREA

Beginning in FY92, the two health-related areas (17 and 18) and the two business-related areas (06 and 07) were combined into areas 51 and 52, respectively. This change was mandated by the federal government when they revised their CIP codes. All degrees previously awarded in Colorado were recoded into the new CIP code structure in this document.

Table 5 is a list of the top-five program areas in FY83 and FY92. Table 6 lists all the areas and is arranged in order from highest to lowest number of awards granted in FY92. The most popular degree area was area 52, Business/Management programs. In FY83 4,143 awards were earned in business, increasing to 4,875 awards in FY92, an increase of 18%.

The second most popular emphasis area was area 51, Health Sciences. This is a direct result of the CIP code restructuring and combining the health-related fields. Last year, the Degrees Granted Report listed area 45, Social Sciences as second in awards.

The rest of the popular program areas differ between FY83 and FY92. In FY83, 2,014 students earned Education degrees, 1,655 students earned Engineering degrees, and 1,503 students earned Social Science degrees. In FY92, 2,395 students earned Social Science degrees, 2,169 students earned Liberal/General Studies, and 1,513 students earned awards in Engineering.

Of the program areas with annual awards over 1,000, Liberal/General Studies and Social Sciences were the fastest growing.

DEGREES BY AREA DEGREE LEVEL

The ten-year period was divided into two halves, FY83-87 and FY88-92. Table 7 shows the CIP code area by degree level. The "FY88-92" column summarizes all the degrees awarded in the second five-year period. The "%Change" column was calculated by subtracting the total number of degrees awarded in the first five-year period from the total number of degrees awarded in the second five-year period and dividing that answer by the total number of degrees awarded in the first five-year period, then multiplying the answer by 100 to obtain percent.

There were 19 active areas at the certificate level. The top three certificate areas were: 1) Health Sciences, 2) Business and Management, and 3) Protective Services. These three areas accounted for over half of the awards at the certificate level.

At the associate level, there were about 16 active areas. The largest number of associate degrees (7,857) were the academic associate degrees. Most of the vocational associate degrees decreased in number between FY88 and FY92. Business and Management, the second highest number of associate degrees granted, decreased by 15%. Three areas, however, increased in total numbers, Health Sciences increased by 22%, Transportation increased by 217%, and Law increased by 39%.

There were about 29 active areas at the bachelor degree level. Over the FY88-92 period, 14,568 degrees were awarded in Business and Management, an increase of 5% over the FY83-87 number of awards. Social Sciences were the next highest number of bachelor degrees (9,302) awarded over the FY88-92 period, an increase of 45%. Engineering had the third highest number of degrees (5,416) but decreased by 18% during FY88-92.

The decrease in the number of Education degrees resulted from a change in the way the state education system educates prospective teachers. Most students seeking to teach majored in an academic discipline, such as Mathematics, rather than Education. Students became credentialed as teachers by completing required certification courses and are now reported in the individual disciplines. Education degrees at the baccalaureate level reflect only two specialty areas: Special Education and Music Education.

The master's degree in Education (5,716) and Engineering (3,362) increased by 21% and 42%, respectively.

Health Sciences and Law accounted for most of the first professional degrees and remained virtually stable over the ten-year period with only a 1% increase in medical doctors and a 3% decline in the number of lawyers.
Physical Sciences and Engineering were areas with the highest number of doctoral degrees awarded, increasing 30% and 62%, respectively.

DEGREES AWARDED BY ETHNICITY

Degrees data were collected by ethnicity and gender beginning in FY86. Three years of data were totalled -- FY86-88 and compared to the three years of data from FY90-92. The total degrees awarded for FY90-92 is in the "FY90-92" column.

Ethnic minorities progressed at every degree level except for Native Americans at the first professional/doctoral degree level. Table 8 summarizes the level of degrees awarded by ethnicity.

Blacks received nearly 700 bachelor degrees over the three year period, an increase of 25%. Blacks also had significant growth at the certificate and associate levels (135% and 51%, respectively). Native Americans also progressed at the certificate (52%), associate (52%), and master's (48%) degree levels.

Asians received a high number of degrees at the bachelor and master's degree levels. Hispanics progressed at every degree level.

Whites received a high portion (37,000 of 43,000 or about 86%) of the bachelor degrees awarded. The greatest rate of growth for Whites was at the certificate and Master's degree levels. First professional/doctoral level degrees declined by 3%.

The number of degrees awarded to Non-Resident Aliens at the master's and doctoral degree levels increased by 64% and 62%, respectively. This exceeds the number of degrees awarded to Colorado resident minorities combined at these levels. Also, the unreported ethnicity category exceeded each ethnic minority group at these levels.

DEGREES AWARDED BY GENDER

MALES

There were 1,861 first professional/doctoral level degrees awarded to males compared to 1,169 awarded to women (see Tables 9 and 10).

The greatest degree level growth rate for males was at the certificate level, an increase of 68%. Most of the certificates were in Health Science (781) followed by Protective Services (715).

At the associate level, 2,167 or 42% of the 5,175 awards were in Liberal/General Studies. The top two vocational associate degrees were Engineering Related Technology (824) and Business and Management (487).

The top three major areas for males at the bachelor level were: Business and Management (4,458), Social Sciences (3,292), and Engineering (2,583). These three areas accounted for over 50% (10,333 of 20,409) of the bachelor degrees awarded to males over the three year period.

At the master's degree level, 1,343 degrees were awarded in Business and Management, and 1,228 degrees were awarded in Engineering.

In addition to the high numbers of first professional degrees in medicine (452), males earned doctoral degrees in Engineering (290) and Physical Sciences (263). There were 232 law degrees awarded.

FEMALES

Over the three-year period from FY90 to FY92, the number of degrees awarded to females exceeded the number of degrees awarded to males at every level except at the first professional/doctoral degree level.

Females earned 1,663 Health Sciences certificates of the total 3,681 certificates awarded to females. The second popular certificate with females was in Business and Management (892 or 24%).

The most popular associate degree was the academic degree in Liberal/General Studies (2,816 of 7,192) The top two vocational associate awards were in Health Science (1,733) and Business/Management (1,577).

Of 22,760 bachelor degrees, the top three were Business and Management (4,234), Social Science (2,878), and Psychology (2,029).

There were 2,535 master's degrees in Education awarded to women. This is 41% of the 6,243 total master's degrees awarded to women over the three-year period.

The next two popular doctoral degrees, after the first professional degrees in medicine (450) and law (200), were in Education (115) and Physical Science (77).

DEGREES AWARDED BY RESIDENCY

In FY93, the Colorado legislature passed Senate Bill 136 (SB136) which sets a numerical percent for resident students in public institutions. This section is devoted to the degrees granted to Colorado residents.

The state total degrees awarded to resident students, in FY92, was 23,276 of 27,017 degrees awarded, or 86% (see Table 11). This is an increase over the FY86 awards of 18,480 of 22,966, or 84%. Although this is an increase, the interim years -- FY87 to FY91 -- had a consistent 87% resident rate.

The research universities had the lowest percentage of degrees granted to resident students. Most of the other colleges had resident awards over 90%.

Multiple degrees may be awarded to one student. Table 11 indicates the residency attached to the degree and includes all in-state degrees awarded. A recent data brief by CCHE analyzed the covelling patterns (out-of-state students establishing residency in Colorado). The study showed that after five years, 44.2% of starting out-of-state students earn a bachelor degree and 20.6% are also Colorado residents.

Jun 93

Notes: - Pikes Peak Community College was unable to report detailed data in FY86.
-- Colorado Northwestern Community College was unable to report degrees in FY86.
[1] Front Range Community College includes Larimer County Area Vocational School beginning in FY90.

DEFINITIONS BY DEGREE LEVEL

CERTIFICATES: Requires the completion of a program that would be completed in 30 to 120 credit hours. Includes 1, 2, and 4-year certificate programs, as well as Post-Bachelor's and Post-Master's certificates (SURDS degree level code 01, 02, 03, 04, or 05).

ACADEMIC ASSOCIATE: Normally requires at least 2, but less than 4 years of full-time equivalent college work in an academic field of study (SURDS degree level code 11, 12 or 13).

VOCATIONAL ASSOCIATE: Normally requires at least 2, but less than 4 years of full-time equivalent college work whose expressed intent is to impart work-related knowledge and skills (SURDS degree level code 11, 12 or 13).

BACHELOR: Normally requires at least 4 but not more than 5 years of full-time equivalent college-level work. Includes all bachelor's degrees conferred in a Cooperative or Work-Study Plan or Program. Also includes bachelor's degrees in which the normal 4 years code 21).

MASTER'S: Requires the successful completion of a program of study of at least the full-time equivalent of 1, but not more than 2 academic years of work beyond the bachelor's degree (SURDS degree level code 31).

FIRST PROFESSIONAL: Requires completion of a program that meets all three of the following: (1) Completion of the academic requirements to begin practice in the profession; (2) At least 2 years of college work prior to entrance to the program; and (3) A total of at least 6 academic years of college work to complete the degree program, including prior required college work, plus the length of the professional program itself. The following fields are recognized as awarding first-professional degrees in Colorado (SURDS degree level code 41):

Dentistry (D.D.S. or D.M.D.)
Medicine (M.D.)
Veterinary Medicine (D.V.M.)
Law (L.L.B. or J.D.)
Nursing (N.D.)

DOCTORAL: Requires work at the graduate level that terminates in a Doctor's degree. The doctor's degree classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field (SURDS degree level code 51).

DEFINITIONS BY RACE/ETHNICITY

The ethnic categories used throughout this report are those defined by the SURDS DATA DICTIONARY and are consistent with the United States Civil Rights definitions. These definitions are as follows:

UNKNOWN: A person having unknown origins and undeclared or missing information.

NON-RESIDENT ALIEN: A person who is not a citizen or national of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely. Resident aliens, who are not citizens or nationals of the United States and who have been lawfully admitted for permanent residence (and who hold alien registration receipt cards -- Form I-551/155), are to be reported in the appropriate racial/ethnic categories along with United States citizens.

BLACK, NON-HISPANIC: A person having origins in any of the black racial groups of Africa (except those of Hispanic origin).

NATIVE AMERICAN OR ALASKAN NATIVE: A person having origins in any of the original peoples of North America, and who maintains cultural identification thorough tribal affiliation or community recognition.

ASIAN OR PACIFIC ISLANDER: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa.

HISPANIC: A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

WHITE, NON-HISPANIC: A person having origins in any of the original peoples of Europe, North Africa, or the Middle East (except those of Hispanic origin).

SOURCES OF DATA:

Data on degrees conferred was gathered from two data collection survey mechanisms submitted by the institutions:

1) Prior to fiscal year 1986, the Higher Education General Information Survey (HEGIS), and

2) the Student Unit-Record Data System (SURDS).

The degrees reported represent the total number of degrees conferred, not the number of students receiving degrees. The two numbers may not be identical since a student may receive more than one academic award in the fiscal year.

---

[1] Programs are listed in Classification of Instructional Programs (CIP code) order. See Appendix B for general area categories and Appendix C for an alphabetical crosswalk by program name to CIP code. Additionally, a blank versus a zero in the fiscal year column reflects program start and discontinuance, as closely as possible. If a program was not yet approved or was discontinued during a previous year, then the column will be blank. A zero in a column means that a valid program awarded no degrees that fiscal year.

Area 50 Visual and Performing Arts 61

Area 51 Health Sciences 63
Area 52 Business and Management 69

---

[1] Programs are listed in Classification of Instructional Programs (CIP code) order. See Appendix C for an alphabetical crosswalk by program name to CIP code. Additionally, a blank versus a zero in the fiscal year column reflects program start and discontinuance, as closely as possible. If a program was not yet approved or was discontinued during a previous year, then the column will be blank. A zero in a column means that a valid program awarded no degrees during the fiscal year.
